

PESTIGATOR

THE ULTIMATE IN INSECT CONTROL now you can use your existing IRRIGATION SYSTEM for Mosquito and Venomous Snake control. Pestigator system will inject MSC, a concentrated and water soluble Cedar Oil solution into the water stream and then on to the sprinkler heads. MSC will be delivered throughout the treated area providing instant Mosquito, Flea, Fly, Chigger, Ant, Tick, Grub and Snake control. The Pestigator works automatically through your existing irrigation panel's extra programs. The results of a one minute spray with MSC are amazing. Biting insects in the air or on the ground are quickly eliminated. MSC has no effect on pollinators or beneficial insects such as Ladybugs, Butterflies, and Bees. Mosquito's and other flying insects immediately retreat from MSC treated areas. Treatment with MSC will create a barrier of re-entry and the interruption of the egg layer cycle will eliminate the next generation of insects. MSC has no effect on Amphibians such as Frogs, Toads and Lizards. With Pestigator technology there is no reason for ugly spray nozzles emitting noxious chemicals to be attached to your home, on your fences or in the landscape. The Pestigator can be purchased for one third or more less than the cost of a misting system. This system will not just change the look of pest control systems; it will remove any look at all. The complete Pestigator System includes everything you need for installation with your PVC pipe and fittings. One Gallon of MSC Concentrate enough for your start up and then a month or more of protection, based on the average yard. Once established, insect control will last up to 3 months per gallon of concentrate, depending on the size and type of environment. The EPA classifies MSC as a Minimum Risk Pesticide. It is safe to Children and Pets. No applicators license required. Hands free fully Automatic System sells for 1895.00 or 2495.00 installed. Manual System sells for 1495.00 or 1995.00 installed. Easy to hook up yourself or contact your local plumbing or irrigation contractor for their estimate. The Pestigator comes fully assembled and ready for use.

Manual w/ 2 gallons of MSC	\$1600.00	Installed	\$ 1900.00
Automatic W/2 gallons of MSC	\$1900.00	Installed	\$ 2200.00

MINI PESTIGATOR

MINI-PESTIGATOR now you can enjoy the same insect free yard experienced when using the full size PESTIGATOR without installing an irrigation system. The MINI-PESTIGATOR easily mounts to your outside wall and hooks to any existing water spigot. Just attach the garden hose and your portable lawn sprinkler to the discharge side of the water driven injection pump and engage the on / off lever. Water flowing through the pump will activate the unit and inject MSC Cedar Oil Concentrate into the water stream of the spray nozzle or lawn sprinkler being used at the desired dilution ratio necessary to accommodate the insect control endeavor you are pursuing. Works great for applying mosquito etc. control solution or liquid fertilizer such as **Lawn Safe** for your plants, garden and shrubbery. Use the injector to deliver a soap solution for washing vehicles, deck, dock, and fence or building structure. PERFECT FOR RV OWNERS. Take it with you and spray your campgrounds for a bug free vacation.

Comes with 1 gallon of MSC	\$ 850.00	Installed	\$ 900.00

CEDAR SHIELD DECK, DOCK & FENCE

The ultimate in WOOD PRESERVATION. This dynamic product triggers the early stages of WOOD PETRIFICATION. Cedar Shield is a PENETRANT, not a coating. Treat your OLD OR NEW deck, dock, fence, outdoor furniture, equine center and any other wooden or bamboo construction with this dynamic Cedar Oil and Silicone solution. Cedar Shields unique penetrating ability gets to the core of the wood and delivers a water, insect and decay proof treatment that will eliminate splitting, checking, cupping and expansion or contraction of the wood. Fastener rejection is eliminated. Strength is increased by fiber and cellular adhesion. **STOPS DECAY AND ROT IN EXISTING STRUCTURES.** Cedar Shield provides protection in below zero to 130f degree temperatures. Can be used inside or outside. Apply using a compression sprayer, air or airless paint guns, brush or roller. Simple and preferred application using a garden sprayer is recommended. Water or oil based paints and stains can effectively be applied after treatment. The composition of Cedar Shield meets FDA FOOD GRADE requirements that are considered "SAFE FOR CHILDREN AND PETS". This product may be used to encapsulate ACQ, CCA and other toxic wood treatments found in PLAYGROUND equipment. **PROFESSIONAL APPLICATION AVAILABLE!!!!**

NOCDOWN III

Specially formulated "Chemical Free" Cedar Oil based active ingredient in concentrated form. Effective for use in control of all Non Beneficial insects. Water soluble with "Molecular Splitter" inerts that promote micron size VMD (droplets) designed for Misting Systems, ULV Fogging, Crop Dusting and typical PCD insect control methods such as compression or pressure delivery. Use inside or outside. Chemical free solution leaves no residue or stain. The pleasant Cedar Aroma creates a "Barrier of Re-Entry. The oil will dissolve flea and insect eggs. Egg layer cycles are disrupted by interference with the insects' octopamine neuro receptors and the next generation of arthropod is eliminated. Dilute with tap water. Will not separate. No protective clothing necessary.

Cost	1 gallon	\$ 225.00
	4 or more	\$ 200.00

MISTING SYSTEM CONCENTRATE (MSC)

MSC is a specially designed and internally modified Cedar Oil formulation created for delivery as an insect control solution in MISTING SYSTEMS and VECTORGATION technology. It is 100% miscible in water and leaves a ZERO NO STAIN residual on plant life, concrete, stone and wood structure when delivered through misting nozzles or irrigation sprinkler heads. Unlike Pyrethroid TOXINS previously used in this type of insect control, MSC's high carbon content increases microbial activity in the plant life and soil rather than destroying it. MSC has no effect on Sight Driven Beneficial Insects such as Lady Bugs, Butterflies and Amphibians such as Frogs and Toads. MSC is a repellent and an insect killer. The aroma of Cedar Oil impairs the mental capacity of non-beneficial insects affecting their pheromone instincts that guide them to all matter, human or other. The Cedar aroma triggers the exodus of the insect and if departure is not immediate, the insect becomes overwhelmed and will succumb. Departure of the insect interrupts the egg layer cycle and eliminates the next generation of pest. The Aroma of Cedar Oil provides a barrier of re-entry by masking the Keremone of all matter in the treated area. Heat Seeking and Pheromone driven VENOMOUS SNAKES are deterred by MSC and will evacuate and avoid treated areas. Unlike Pyrethroid solutions, MSC has no estrogen elevation issues that promote cancer in females, human or animal. Suggested application rate is 25 ounces per 50 gallons of water, barrel or water line injection systems. Irrigation systems excel with programmed injection of MSC into the delivery stream in the last 1 to 2 minute delivery cycle. Misting system performance is enhanced with frequent and extended emission times. MSC is a concentrate and is sold in gallon containers.

BEST YET

BITING INSECT SPRAY FOR PEOPLE PETS PREMISE "INSTANT KILL" for Flea infestations in dwellings or on Cats and Dogs. Recommended by Prudent VET's as a replacement to toxic and non effective Frontline, Advantage and other SPOT DROP PET MEDS that is killing your pets. BED BUG CONTROL for Hotels, Motels, Homes, Condo's and Apartments. For use in eradication of HEAD LICE, Goat lice and other Louse parasites in human or animal life. LAST RESORT MITE CONTROL for humans, homes and citrus warehouses. Can be used in NON THERMAL fogging protocol as practiced in the Hospitality Industry. The ultimate in personal relief from Mosquitoes, Fleas, Flies, Ticks, Chiggers, No-See-Ums, Gnats and many others. A light misting application of this Cedar Oil Solution will provide all day protection from biting insects. It will not sweat off like DEET products or other natural insect repellents. BEST YET can be used on children of all ages and animals of any kind. It can be applied directly to the skin or over clothing. It is clear and non staining and will leave the skin with a clean smooth and refreshed feeling not found with aerosol repellents. BEST YET can be used around the house to control those difficult insect invasions by Fleas, Scorpions, Roaches and ants of all species. A quick shot of this solution on the target insect or its nest will result in INSTANT DEATH to the victim. Treatment of cupboards, pantries and food storage areas are recommended. Evaporation of the non water base treatment is prolonged providing extended treatment to the area. BEST YET is an effective coating for window screens and doorways and will provide a barrier of entry from various pests. BEST YET is considered a Minimum Risk Pesticide by the EPA and is formulated with FDA food grade ingredients and Cedar Oil. It is Safe to Children and Pets. BEST YET is available in Quart Spray Bottles.

Cost	1 quart	\$ 49.95
	6 quarts	\$ 200.00

SNAKE-MOLE-GRUB CONTROL

SMG Concentrate is formulated with Cedar Oil and Ethyl Lactate Bio Solvents. In concert with a water carrier, the two actives are instrumental in both killing and surfacing Grubs from the infested turf currently harboring this destructive insect. The eradication of Grubs interrupts several food chain cycles. The food source for Moles is Grubs. Moles tunnel in the areas below the turf in search of Grubs. The food source for Venomous and heat seeking Snakes are Moles. Snakes frequent grub infested turf in search of the Mole. SMG when applied properly will eliminate the EGG LAYER CYCLE of the Grub. After treatment and subsequent to the surfacing of the existing Grub population, the aroma of Cedar Oil will repel the May beetle or June bug. Future generations of Grubs will be avoided by repelling the bug that lays the egg, which evolves into the Grub worm. Areas continually treated with SMG manually or through an irrigation system will be perpetually grub free. Venomous Snakes, like non-beneficial insects are pheromone driven. The aroma of Cedar Oil masks existing Kairomones (aromas) as well as impairs the mental faculties of the Snake and deters them from entering the area. Initial treatments with SMG should be done to obtain a 1-inch depth penetration of moisture in the soil. Suggested application with a hose end sprayer or any other type of high volume water disbursement device is recommended. Application prior to rainfall will promote the leaching of SMG into the soil and enhance the treatment results. The treatment is effective on numerous species of insects including but not limited to Mosquitoes, Flies, Fleas, Chiggers, Ticks, Mole Crickets and others. SMG will dissolve the eggs and larvae of all insects. SMG is classified as a Minimum Risk Pesticide by the EPA and is Safe to use around Children and Pets. It is recommended for use on any type turf such as Residential, Commercial and Golf Course.
